If protection against high speed particles is required at extreme temperatures, then the eye protector should be marked with the letter "T" immediately after the impact letter, for example; EN-166-F-T. If the letter T does not follow the impact letter then the eye protector can only be used against high speed particles at room temperature. **Warning!** The signs at the safety frame should be compatible with the signs mentioned above, including the name of the frame.

5. The object of the declaration described in point 4 is in conformity with the relevant Union harmonisation legislation:

European Standard EN166:2001 for personal eye-protection

Regulation (EU) 2016/425 of the European Parliament and of the Council of 9 March 2016 on personal protective equipment.

Regulation 2017/745 on Medical Devices

As manufacturer/Glazer we control the permitted combinations to ensure compliance with the EN166:2001

The unmounted lens blanks conform to ISO8980-1 or 8980-2 as applicable

The material and parts are not known to cause adverse affect to user hygiene or health, nor are likely to cause irritation, during normal use
